Service-Learning Campaigns

Take action on the issues you care about in your community and around the world.

**WE scare hunger**
Come together to help scare away hunger. Find out from your local food bank how you can best support them, whether through dropping off food or financial donations. Use social media to spread the word and raise awareness about the root causes of hunger.

**WE promote respect**
Come up with a list of rules or a “Community Code” for your class that makes people feel included, whether you’re learning virtually or in-person. Create a list of your hopes and fears for the year as you take on this new learning experience.

**WE are silent**
Your voice is a powerful tool for social change. Speak up or go silent to amplify the voices of those who go unheard around the world.

[WE.org/wearesilent](http://WE.org/wearesilent)

**WE are one**
Making our communities more inclusive is more important than ever. Discuss as a class the ways we can help alleviate the stress people around us are facing as the ways we learn, live and work have changed.

[WE.org/weareone](http://WE.org/weareone)

**WE volunteer now**
Even when volunteering in person isn’t possible, there are so many ways you can give back virtually—whether it’s supporting an organization with your social media skills, starting an online reading club for younger students, and more.

[WE.org/wevolunteernow](http://WE.org/wevolunteernow)

**WE go green**
Take part in a classroom challenge where everyone records the ways their families reduced, reused or recycled over a week. Or you can each collect trash while walking around outside and track how much each individual or group collected.

[WE.org/wegogreen](http://WE.org/wegogreen)

**WE are innovators**
Have a pitch-off event where students work on innovative new product ideas and share them with one another. Choose the most exciting idea to tackle as a class action plan.

Tech for Good Badge

The WE Schools Tech for Good badge is a globally recognized credential signifying innovative application of technology to real-world issues. This technology-powered program engages students and educators to incorporate technology into their service-learning actions, enhancing their experience and bringing valuable 21st-century digital skills into their service-learning, thanks to the support of Microsoft.

WE Schools Foundational Module

We suggest starting your journey with the WE Schools Foundational Module to help you create the optimal learning environment for your students before working through our service-learning campaigns and programs. The WE Schools Foundational Module provides educators with a sequenced approach to develop supportive instructional practices that promote positive relationships between students, teachers and peers, and safe and caring environments that foster engagement and social and emotional learning. With this foundation, students are supported in becoming agents for positive change, engaged learners and compassionate citizens of tomorrow.
